

ARIEL ANGULO MÉNDEZ

Jr. Cloud & DevOps Engineer · AWS · Terraform · Network Automation

San José, Costa Rica · +506 8309-9772 · arielangulomendez@gmail.com · linkedin.com/in/ariel-angulo-mendez · github.com/arielangulo · [Portfolio](#)

PROFILE

Engineer-in-training with hands-on experience building infrastructure for an Internet Exchange Point: developed and deployed `crix.cr` (Next.js, PostgreSQL) with fully automated CI/CD, and independently designed a network observability pipeline (Akvorado, ClickHouse, Python, Docker, Linux) later replicated while advising NIC Brasil and TIGO CR. Solid foundation in networking (TCP/IP, NetFlow/sFlow), automation, and infrastructure as code. Currently preparing for the AWS Solutions Architect Associate certification (SAA-C03), looking for my first role as a Cloud Engineer / DevOps Engineer.

EXPERIENCE

Applied CRIX-NICCR Automation & Systems (Internship) — NIC Costa Rica — CRIX · January 2026 – August 2026

- Designed and developed `crix.cr` (Next.js + PostgreSQL, Microsoft Entra ID authentication) end-to-end for Costa Rica's official Internet Exchange Point, now in continuous production.
- Solved a real network constraint (internal servers isolated behind FortiClient) by architecting and deploying a self-hosted GitHub Actions runner, achieving fully automated CI/CD with zero manual deployment steps.
- Independently designed, built, and validated a CDN traffic analysis pipeline (Akvorado + ClickHouse + Python, Dockerized on Linux) to measure traffic consumption across CRIX's ISP members (Tigo, Telecable, Cabletica).
- Reached full technical-pilot status solo, with no existing infrastructure to build on; continuous production was deprioritized when the team shifted focus to the `crix.cr` platform.
- Applied that expertise externally, providing remote guidance to NIC Brasil and TIGO CR on Akvorado deployments, including a self-authored installation guide.

PROJECTS

`crix.cr` — Official website, Costa Rica Internet Exchange Point

Next.js · PostgreSQL · CI/CD · GitHub Actions · Microsoft Entra ID — In production

- Full end-to-end development and deployment of CRIX's official site, with fully automated CI/CD.

CDN Traffic Analysis Pipeline — Technical pilot for network observability

Akvorado · ClickHouse · Python · Docker · Linux · sFlow

- Complete solo design and implementation, from architecture to automated report-generation scripts.

Adiestramiento Montesuma — Business website

React · Vite · JavaScript — Published

- Independent design, development, and deployment from start to finish for a real business with 30+ years in operation, including Google Maps and WhatsApp integration.

EDUCATION

Bachelor's Degree, Computer Engineering — ULACIT · January 2024 – August 2026

Coursework and internship completed August 2026. The Bachelor's degree is conferred together with the Licentiate degree upon completion of the latter.

Licentiate Degree, Computer Engineering with Emphasis in Networks and Telematic Systems — ULACIT · September 2026 – 2027 (estimated)

CERTIFICATIONS

-
- AWS Certified Solutions Architect - Associate (SAA-C03) — In progress

TECHNICAL SKILLS

Cloud / AWS: AWS, EC2, S3, VPC, Lambda, IAM, Infrastructure as Code (IaC)

DevOps / Automation: Terraform, CI/CD, GitHub Actions, Docker, Linux

Networking: TCP/IP, NetFlow, sFlow, Traffic Monitoring, Akvorado

Development: Python, JavaScript, Next.js, React, Node.js, SQL, PostgreSQL, ClickHouse, Git

Languages: Spanish (Native), English (C1, certified), French (Basic, A1)
